Lead the UI/UX research & design, developed an Angular.js framework from scratch, developed a Node.js server framework from scratch, creation of a Node.js CLI, branding & marketing, represented the company internationally at Web Summit in Dublin 2015.

Documaps

2014

Co-Founder, Developer

- 2013

With over 9 years in technical & leadership roles I am currently working as a **tech lead, designer & mentor** for the modern web space.

I am looking for opportunities to build and grow dynamic teams to tackle large, complex problems that will make a tangible impact on the world.

Coming from a background including startups of all sizes, agencies, & large corporations I excel most in open, fast, & driven environments.

My approach as a leader is to unblock the road ahead (engaging with stakeholders where necessary), empower each member with the right resources & knowledge, & inspire the team to align with the business' objective.

Technically I deliver robust full-stack solutions, master new frameworks & languages quickly, & am always eager to tackle new challenges to find the optimal solution to a problem.

My preferred tech stack I know & ❤️ :

Node.js

React/Redux

AWS

Typescript

GraphQL

Figma

Python

Docker

D3.js

Jest

MongoDB

Postgres
