2013

Front-End Developer

Matthias IT

2013
— 2012

Database Administrator

Synengco

2012
— 2011

Junior Web Developer

With over 8 years adding value in IT companies, I'm currently a **developer**, **designer** & **speaker** working as a **tech lead and mentor** in the modern web space.

Coming from a background of startups, web agencies & other internet ventures, I excel most in environments where I can innovate, lead, design & see these ideas through to a finished product.

I'm a proven leader, having taken very extensive training in personal growth education, & experimenting in the IT industry from designing, coding, personal startups & freelancing. I teach coding classes on my weekends.

Given the opportunity, I work to my full capacity in a close-knit team environment with open communication & a clearly defined direction. I bring high energy to my work & my team & am rather socially driven.

My preferred tech stack I know & ❤️ :

Node.js

React/Redux

AWS

Typescript

GraphQL

Sketch

Python

Docker

D3.js

Jest

MongoDB

Postgres
